A Quarter Century Experience with a Health and Welfare Fund
by
Irving I. Coken

This presentation is a twenty-five year history of a Health and Welfare program that has withstood the test of time.

Following the end of World War II, the leaders of the IBEW became aware that for the betterment of their membership, wages alone would not suffice, and fringe benefits were necessary to improve the lot of the membership of the IBEW.

Accordingly, through Collective Bargaining in 1950, our chapter in agreement with our Local IBEW Union established a Health and Welfare Trust Fund.

The Trust instrument provided in general that the Trust would be administered by a Board of Trustees consisting of six members, three appointed by the Union and three appointed by the Chapter. The Trustees were obligated to collect contributions from participating employers and would devote the Fund to payment of sickness, accident, death and similar benefits to employees.

Having been an Electrical Contractor since 1923 and a Charter Member of the Chapter since 1946, I was appointed by the Chapter to be a Trustee and in sequence was elected the Chairman of the Board of Trustees, a position I have held since.

The initial contribution by the contractors was ten cents (10¢) per hour from 1950 until 1965, and increased as follows:

1966-1968	\$.13 per hour
1968-1972	\$.18 " "
1973-1974	\$.38 " "
Ending 1975-1976	\$.48 " "

Attached is Exhibit A, and you will note that from the period 1950 to 1968 (line 18) we show a fund of \$465,221.08. During this period all this money was in savings banks and checking accounts in various banks of Rhode Island. When we ran out of banks in Rhode Island, the new money was placed in various out of state banks. This investment method was very unorthodox and through these years I voiced my objections but was overruled by the majority.

Referring back to Exhibit A, you will note the profit was increasing steadily and while this was good news it did bring the Internal Revenue into the picture. They reviewed the years 1963, 1964 and 1965 and informed us they wanted a piece of the profit - \$23,916.32 was the exact amount. But our attorney and our accountant advised us (and I agreed with them) that we should fight the payment to the IRS. The majority of the Board refused to accept their advice and, as a result, we had no choice but to pay the taxes.

Time and time again through the years, I proposed that we engage a tax attorney to change our tax status in accordance with IRS Tax Code Section 501 (c) (9).

In 1974 when we had a completely new Board of Trustees (I remained as the only holdover) I was able to get the Board to agree to my request.

The attorney we hired did an excellent job in presenting our case to the IRS. After a short period of time, the Government approved our request and our tax status was changed. The cost of the attorney was \$650.00.

It was around this same period 1963-1965 that the Union members became the most difficult to get along with. They were making many unnecessary demands of the Committee. Such as:

They took over the bookkeeping of the Fund, they would prepare a financial statement, pass them out at the Board meetings and after the meetings they would pick them up again.

There were internal political problems among the Union members at this time. We also believe it was an attempt by the Union to take control of the Fund. We were forced to fight back to avoid this, but in so doing had to make concessions to them. We are still living with problems today caused by the concessions made then.

It was around the period of 1967 that the Board finally agreed with me that we should purchase stock. In November 1967 we purchased 500 shares of #1 stock for \$24,667.26; in 1971 this particular stock had a two to one split and on my recommendation we sold the stock for \$38,715.71 which meant a net profit in four years of \$14,048.45.

Because of the success of our first venture into the stock market, the members of the Board agreed from time to time to the purchase of additional stock.

It was not all peaches and cream in the years following and there were many periods of frustration due mainly to the fact that electricians and electrical contractors, as a group, are not that knowledgeable in financial matters.

A case in point would be stock #2 which we began purchasing in 1967. During a period of two to three years we had accumulated 3,000 shares of this particular stock. The stock then split two to one giving us 6,000 shares at a cost of 14-3/4 a share.

In 1973 when this stock was selling at $43\frac{1}{2}$ I proposed we sell it. The Board did not agree with me and instead authorized me to sell 1,000 shares. (On this 1,000 shares, we made a profit of \$29,306.65). If they had allowed me to sell the balance as I requested, we would have added \$146,533.25 profit to our fund.

We still have the remaining shares of this stock in our portfolio, and for period ending December 31, 1976 this stock was selling for $16\text{-}3/4$ a share.

Getting back to the purpose of the Fund, with the surplus increasing through the years, we were able to do what I spent twenty-five years wanting to do. That is: we have increased the benefits for the men (many of them are the sons and grandsons of the men who started out with me in 1923). We increased Life Insurance for the retirees and we also gave the men a limited dental program of \$400.00 per person, per year.

Along with Exhibit A, which shows the receipts from the contractors, expenses, premiums, etc. from 1950 to December 31, 1976 (A History of Blood, Sweat and Tears) we have included Exhibit B showing the operations of the Trust for 1976, which unfortunately shows a loss of \$49,047.63, but the Trust is still solvent. It is my belief that this deficiency is caused by the present business conditions in our Local area. Also enclosed you will find Exhibit C which shows my own records of the operating cost of the Fund for 1976.

All things considered, I have enjoyed the challenge of the last twenty-five years, and as long as my health permits me I hope to spend my remaining years on the Committee.

Some changes will have to be made. Because of the requirements of the Employees Retirement Income Security Act of 1974, I have proposed to the Board of Trustees that we hire a paid administrator (with an expertise in the market) to handle all future investments of the Trust Fund. I recommend this to each and every group of Contractor-Union members who serve as Trustees on their Local Trust Funds. About the only stipulation is that the administrator be neither an Electrician nor an Electrical Contractor.

LOCAL UNION 99 HEALTH AND WELFARE FUND
