

## STATEMENT OF SUPPORT ADOPT-A-SCHOOL PROGRAM

The International Brotherhood of Electrical Workers (IBEW) supports the Adopt-a-School program initiated by the National Electrical Contractors Association (NECA). The goal of this program is to strengthen the connection between the industry and students and establish a presence in local schools. By raising awareness and enthusiasm among students, their families, and educators about career opportunities and training programs, we can cultivate a talent pipeline for the future electrical contracting workforce.

The Adopt-a-School program creates an opportunity for the electrical contracting industry to assist communities in need while fostering a valuable resource for the future. By offering educational opportunities, supplies, and support, we can enhance students' classroom experiences and career prospects. This approach not only benefits challenged communities but also helps the industry build a skilled workforce. Through this program, the industry can enhance its visibility and impact at both local and national levels.
