

Do your workers need NFPA 70E training?

One- and two-day courses, taught at your location by Technical Committee members and NECA subject matter experts are now available.

NECA Education is now offering one- and two-day courses on NFPA 70E *Standard for Electrical Safety in the Workplace* at your location.

The **one-day course** is designed to provide attendees with a clear understanding of the rules and regulations related to this standard and its relevance to Federal OSHA regulations. Following this class, participants will be able to:

- Discuss the NFPA 70E
- Identify relevant Federal OSHA standards
- Discuss planning and elements of control
- Identify rules and regulations for proper risk assessment
- Describe the importance of personal protective equipment selection
- Identify the proper care and maintenance of equipment
- Discuss the selection of electrical protective devices

The **two-day course** will additionally evaluate attendees on applying the provisions and requirements of the 2018 NFPA 70E. Following this class, participants will be able to:

- Apply the provisions of NFPA 70E
- Discuss employer and employee responsibilities
- Explain a systems approach to safety
- Discuss qualified persons
- Describe electrical safety management systems
- Discuss planning and elements of control
- Identify best practices

Attendees will receive multiple industry references, including the NFPA 70E Standard.
