Risk Managing Your Fleet

Leadership and Changing Behavior

2

Leadership Defined

- What is Leadership?
- Leadership is Influence...Nothing More, Nothing Less.
John Maxwell¹ (#1 New York Times Best Selling Author on Leadership)
- How successful you are at *Influencing* others will determine your *Leadership Effectiveness*
- No matter your role or position in your company you can *influence*, or *lead* others

¹John C. Maxwell, 21 Irrefutable Laws of Leadership – 2: The Law of Influence

2022 NECA SAFETY PROFESSIONALS CONFERENCE

3

Leadership versus Management

- John Maxwell also says that “Managers can maintain direction, but they can't change it. To move people in a new direction, you need influence.”¹
- **Risk Management** is important
- But **Leadership** is necessary first, to change attitudes, behaviors, and direction in an organization

Make sense?

4

Why focus on your fleet?

- For the vast majority of businesses it is the biggest exposure you have
- Particularly with the societal and legal climate we see today
- The term to define this is: Social Inflation

2022 NECA SAFETY PROFESSIONALS CONFERENCE

5

Common Definition

- ***Social Inflation***: Used to describe the rising costs of insurance claims resulting from things like increasing litigation, broader definitions of liability, more plaintiff-friendly legal decisions, and larger compensatory jury awards.

– Insurance Business America

2022 NECA SAFETY PROFESSIONALS CONFERENCE

6

Causes of Social Inflation*

- Distrust in big corporations and their lawyers
- Third-party litigation funding
- Increasing sophistication of the plaintiffs' bar
- Psychological tactics to more readily accept an inflated value (anchoring) – emotions vs. facts
- Active advertising by the plaintiffs' bar
- Jurors more aware of “blockbuster” verdicts due to social media
- Changing composition of the jury pool
- Medical expenses increasing year on year
- Shifts in perceptions and attitude – delivering ‘social justice’
- Influence and proliferation of social media (narrative vs. facts)
- New litigation tactics (e.g. exploitation of advanced analytics)
- Short claims cycles due to cost pressures and reputational aspects
- Erosion of tort reform

Jury Anchoring

- Anchoring creates a cognitive bias among jurors so they later rely on a specific reference point when issuing an award
- Example: \$20M award obtained by anchoring the jury to \$80M in opening statements:
 - **Actual Juror #1:** *We came up with a percentage approach, and that's what we all discussed. We started with what the plaintiff was asking for — \$80 million, which seemed like a very high amount, and went down and down from there.*
 - **Actual Juror #2:** *None of us had been on a jury before, so we had no idea where to start. What's a life worth? It would have been nice to have some precedent to go by, but we didn't. So, we started with what they gave us, and then took off a percentage.*
 - **Actual Juror #3:** *Since trial, I've learned there are many lawsuits related to this product, and our damages award was on the high side — to say the least — but we didn't know what the norm was. All we had to go by is what the plaintiff was asking for.*

*Note: while this is a real life example, it is not a Federated claim.

8

Litigation Financing

- High limits encourage investors to buy a stake in the outcome of a lawsuit
- In the vast majority of states there is no legislation that would allow the jury to know this is going on
- Disclosure of policy limits help litigation funding companies “underwrite” their investment
- The lawyers and financiers who bring these types of suits tend to be the main beneficiaries—not the injured

9

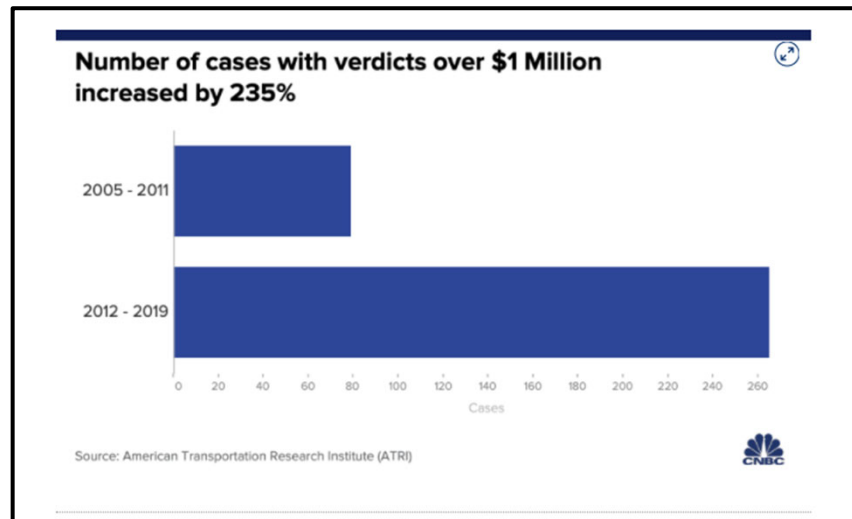

And many more...

- Potential for biased judges
- Lawyer advertising
- Admissibility of junk science
- Frivolous suits
- One-sided recovery of attorney's fees
- Class action abuses
- Forum shopping

16

Again, how does this make you feel?

- It is my worst nightmare
- Distracted driving **IS** an epidemic
- People are dying needlessly
- There are NO accidents, there are just crashes
- Preventable crashes

17

What we can do about it

1. Be a leader!
2. Lead change!
3. Create a culture of safety and risk management in your business
4. Change behaviors and practices
5. Use proven practices and technology
6. Use the power of your association to educate your lawmakers and lobby to change what we can change for tort reform

HOW IT WORKS

- The employee's phone has to pair through Bluetooth with a tag in a company-owned vehicle
 - The tag in the company vehicle is what's being located, not their phone
 - Their phone only provides trip data if it's being used while the tag/vehicle is in motion

What it is NOT

- Dash Cams
- DOT Compliance/Data Logs
- Real Time Fleet Tracking
- Fleet Management
- Rate Determination

What it IS:

- Risk Management Tool
- Vehicle Route Report
- Fleet Vehicle Location
- Incident Measurement
- Individual Driver Coaching
